-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-16 are presented for examination.
2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-12 of prior U.S. Patent No. 6,375,540. This is a double patenting rejection. The claims of US 6,375,540 are of broader scope than claims 1-16 of Applicant, and are deemed to fully anticipate the subject matter of these claims.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen('050) is cited of interest to show an apparatus for polishing a wafer comprising a sensor for monitoring the pad temperature during polishing and integrating the temperature change of the polishing pad over time and comparing it with stored integration coefficients to arrive at an endpoint. Chen et al('442), and Chen('952) are cited of interest to show a polishing apparatus having an infrared temperature sensor for use in measuring polishing pad temperature for endpoint determination. Thornton et al and Krusell et al are cited to show fluid pressure sensors located at a leading edge and trailing edge of a wafer to sense a change in pressure of the fluid as a means of endpoint detection. Boehm, Jr. et al is cited to show a linear polishing apparatus with a temperature sensor for adjusting the temperature of the belt.
